

Product Change Notification

Date of Notification 29 April 2009

Change Minor (Information only)

Part Numbers Affected Screw Terminal Electrolytic Capacitors (all series, all sizes)

Notification Product Marking

Notification Description (Including Extent, Reason)

In addition to the polarity marks close to the terminals, “-“ (minus) marks will be printed on the sleeve of the screw terminal capacitors. The difference in the appearance of the sleeves without and with polarity marks is shown in Figures 1 & 2.

The additional polarity marks on the sleeve allow for easier assembly of the component into the customers’ applications. The change has been requested by several of our customers.

There is no performance or reliability impact from this change

Excluded Parts none

Alternate Parts N/A

Effective Date immediately

General Manager Jianghai Europe
